

Coatings for the Range of Chemicals:

**Ceramic Polymer high-performance coating “Proguard VEG” –
resistant against 20% hydrochloric acid!**

Ceramic Polymer GmbH
Daimlerring 9

www.ceramic-polymer.de

In September, our partner Witaco-Tanktechnik from Hameln/Germany has conducted an internal coating with highest product requirements.

The trailer has a capacity of 79 cu. meters and is destined for the transport of 20% hydrochloric acid. There are very few coatings available, which show a sufficient resistance against such aggressive and highly corrosive liquids.

Due to the combination of high quality resins and selected fillers, the Ceramic Polymer product “Proguard VEG” provides this outstanding resistance to aggressive chemicals, even at high operating temperatures. Moreover, “Proguard VEG” is solvent-free and features an excellent abrasion resistance. Like every Ceramic Polymer coating for steel applications, “Proguard VEG” can be applied directly on the sand-blasted substrate by conventional airless spraying methods.

Technical Information:

Project: Trailer for 20% hydrochloric acid
Dimension: 79 cu. meters
Application of the Coating: Witaco-Tanktechnik
Coating Product: Proguard VEG

The German company Witaco-Tanktechnik features more than 25 years of experiences in the fields of restoration and protection of tanks. The extensive business activities range from professional and mobile blasting methods to competent coating applications according to Water Resources Law. With comprehensive know-how and modern equipment Witaco-Tanktechnik provides effective and durable corrosion protection for tanks, steel constructions and special vehicles of all kinds.

Our Product:

- Proguard VEG

High-end coating "Proguard VEG"

Properties

- Internal coating
- 100% solvent-free
- High-grade chemical resistance
- Excellent abrasion resistance
- High temperature stability
- Direct application on metal substrates

Range of application

- Storage tanks for hot, aggressive liquids and gases (concentrated acids and alkaline solutions, diesel, heating oil, sweet and salt water)
- Process vessels
- Tanks for special vehicles
- Pipework
- Separation vessels

Are you searching for the ultimate coating for highest requirements?

Would you like to get an insight into our versatile portfolio?

Our corrosion protection team will gladly assist you!
